---

second is a picture. I want the first control to be visible, and when the second control is clicked the first should be hidden and the second displayed. I have tried with the following code but it doesn't work. private void groupBox\_Click(object sender, RoutedEventArgs e) { pictureBox.Visibility = Visibility.Visible; linkLabel.Visibility = Visibility.Collapsed; } A: Simply set the visibility of the other controls to Collapsed: pictureBox.Visibility = Visibility.Collapsed; linkLabel.Visibility = Visibility.Visible; [Perioperative characteristics of patients with peripheral arterial disease].
